**MOURNING THE DEATH OF JAMES HILL FROM COVID CONTRACTED WHILE DETAINED  
BY ICE AT ICA-FARMVILLE IN VIRGINIA**

Farmville, Virginia. August 8, 2020 - We mourn the loss of James Hill, a [72-year-old man who died of COVID-19](#) after contracting the disease while detained at the Farmville detention center, operated by the private prison company Immigration Centers of America (ICA). Despite being high-risk of death from COVID-19 due to his age, James Hill had been detained at ICA-Farmville between April and July of this year, as the global pandemic spread like wildfire in ICE facilities across the country. He was supposed to return home to Canada on July 9th, but fell ill and was hospitalized days before his flight. On Wednesday night, he lost his fight against COVID and became the [17th person to die in ICE custody](#) this fiscal year.

James Hill's death was entirely preventable. He, along with nearly 90% of the detained population at Farmville, contracted COVID after ICE transferred 74 people from Florida and Arizona into ICA-Farmville in June. 51 of those 74 people later tested positive for COVID-19, and, shortly after the transfer, the entire facility became overwhelmed with COVID. Mr. Hill also suffered aggravated COVID symptoms after [ICA-Farmville guards used pepper spray](#) against people protesting the facility's abysmal response to the COVID-19 outbreak.

We join the long-standing [demands](#) of those detained at ICA-Farmville for their release in response to ICE and ICA-Farmville's continued and systematic medical neglect. It is too late to save Mr. Hill's life, but we can still ensure that we do not senselessly lose another. Farmville should be shut down for good, and ICE should cease its blind reliance on the incarceration of immigrants.
